

THERMO-FELT

THERMO-FELT

Thermo-Felts are categorized into three types such as:

- «**Jean**» Thermofelt which is made of **recycled jean fibers**
- «**Polyester**» Thermofelt made from polyester fibers
- «**Heavy-Layer**» felt which not only absorbs noises, but prevents walking hits on floors, ceiling. It includes a PVC layer attached to the recycled fibers.

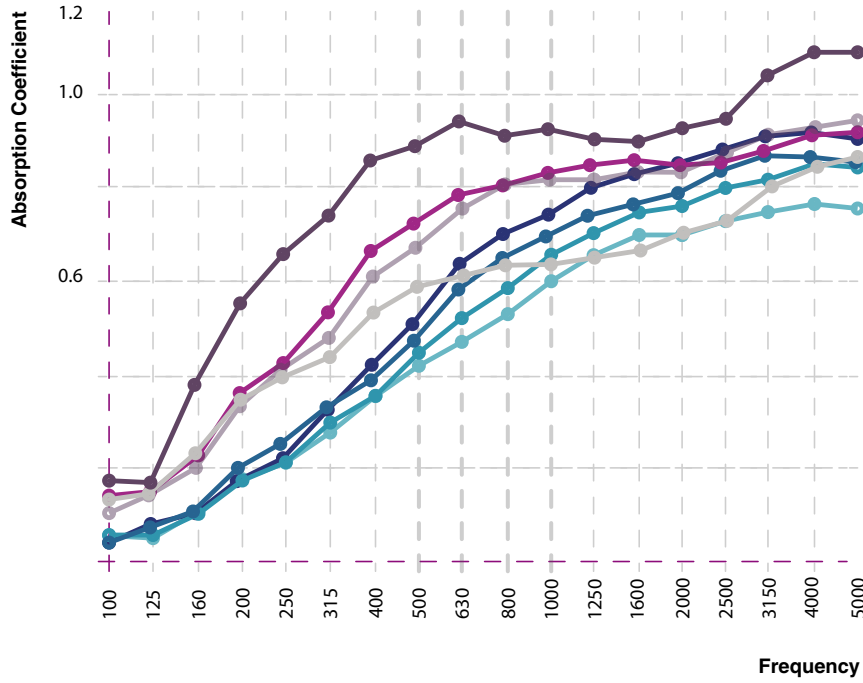

●
Thickness:
1-7 cm

●
Absorbent Co-efficient:
up to 0.9

●
Thermal & Moisture
Insulation

●
Transmission Loss:
19-28 db
